Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In the formula (I) in claim 1, there are no bonds between the phosphorus atom on the left and the two oxygen atoms. The recitation of “n” being “an integer between 1 and 3” does not state whether these end values are included or excluded. Claims 2-4 depend from claim 1 and would thus also be indefinite. Claim 2 is also confusing because it recites a “mixture” that may have only one component, which is encompassed by the term “at least one”. In claim 3, the “Z” in “LiPFZ<sub>6</sub>” is not defined. There is no element symbolized by the single letter “Z”. In “LiClO<sub>4</sub>”, the “l” appears to be incorrect, and should instead be “I”, so as to form “LiClO<sub>4</sub>”.

The disclosure is objected to because of the following informalities: The lack of bonds between the left phosphorus and two adjacent oxygen atoms of formula (I) is also seen on page 4 of the specification. Appropriate correction is required.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Choy *et al.* disclose organic electrolyte additives containing benzene rings. Gan *et al.* (US 6,919,141), Han *et al.* (US 2004/0142246) and Yokoyama *et al.* (US 5,580,684) each disclose electrolytes comprising organic phosphates.

Claims 1-4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. The prior art, cited either

Art Unit: 1795

herein or by applicants, does not disclose a battery electrolyte including the benzene-substituted phosphates of formula (I) in claim 1.
